Overview of ATCOM

ATCOM is the leading VoIP hardware manufacturer in global market. We have been keeping innovating with customer's needs oriented , working with partners to establish a total solution for SMB VoIP with IP phone , IP PBX and Asterisk cards

With over 10 years' experience of R&D , manufacturing and service in network and VoIP filed ; mission of creating the biggest value for IP terminals , we commit ourselves in supplying the competitive IP phone and other terminals for IP PBX , softswitch , IMS , NGN providers and carriers; supplying the competitive total VoIP solution for SMB market. We keep improving the customer's experience and creating the bigger value with our reliable products. Until now, our VoIP products have been available in 100+ countries and used by millions of end users.

1. Overview of Rainbow 1

Rainbow 1

Type	POE	Power adapter
Rainbow 1	yes	Standard accessory

Interfaces

- Power input: DC 5V, 1000mA
- LAN: RJ45 port
- PC: RJ45 port
- EXPAN: RJ45 port
- Headset jack 1 : RJ9 port
- Handset jack 1 : RJ9 port

Hardware

- LCD: 132×52 4-gray scale
- FLASH: 16M
- RAM: 16M
- CPU: 262MHz Dual Core
- LED indicator: 1 Status Light

Software

- Sip 2.0 (RFC3261) and other related SIP RFCs
- 1 SIP lines
- STUN
- Jitter Buffer, VAD,CNG
- G.711A/u, G722, G.723, G.726-16, G.726-24, G.726-32, G.726-40, G.729 , Lin16-16, iLBC
- Echo Cancellation
- SIP Domain name, Authentication
- DTMF inband and outband (inband, RFC2833, info)
- Call transfer, Call forward, 3-way conference, Call hold, Call back
- DND(Do Not Disturb), Auto answer, Blacklists, Block Call-ID, Block Anonymous call, Dial plan, IP call
- Phone book with 200 white records and 100 black records, 100 answered calls, 100 missed calls, 100 dialed calls
- Update via HTTP, FTP, TFTP, PNP
- Syslog
- SNTP
- WEB
- Different user access mode
- Multi-language
- Soft button: soft button * 3

Network

- LAN/PC: Support bridge mode
- Support PPPoE (ADSL,cable modem used for Internet connecting)
- Support VLAN (DATA VLAN and VOICE VLAN)
- Support L2TP VPN
- LAN support Primary and Secondary DNS
- LAN support DHCP Client
- Support QoS

Management and Maintenance

- Support safe mode and firmware updating under safe mode
- Support different level user management
- Configuration via web , keyboard
- Support multi-language and different language switching
- Auto provision (Firmware and configuration file)
- Support system log and call log

Protocol

- IEEE 802.3 /802.3 u 10 Base T / 100Base TX
- PPPoE: PPP over Ethernet

- DHCP: Dynamic Host Configuration Protocol
- SIP RFC3261, RFC3262, RFC3263, RFC3264, RFC3265, RFC2543, RFC3489, RFC3842, RFC3515, RFC2976, RFC3428, RFC2327, RFC2782, RFC1889
- TCP/IP: Transfer Control Protocol/Internet Protocol
- RTP: Real-time Transport Protocol
- RTCP:RTP Control Protocol
- DNS: Domain Name Server
- TFTP: Trivial File Transfer Protocol
- HTTP:Hypertext Transfer Protocol
- FTP:File Transfer Protocol

Compliant Standard

- CE:EN55024,EN55022
- Comply with ROHS in EU
- Comply with ROHS in China

-

Explanation:

The letter "e" is the first letter of "environment" and "electronic". The rim is a round with two arrow, stands for recycle. The number 20 stands for the years of environment protection. Please note the years of environment protection is not discarding year of usage life.

- Operation temperature: 0 to 45° C (32° to 113° F)
- Storage temperature: -5° to 55° C (12° to 131° F)
- Humidity: 10 to 90% no dew

Packing List

Model	Phone	Handset	Handset line	Stand bracket	Power adapter	Ethernet Cable	User Manual CD
Rainbow 1	1	1	1	1	1,Standard accessory	1pcs 1.5m	1

Note: Power adapter (Input: AC 100~240V, 50/60Hz; Output: 5V, 1000mA;)

Installation

Connect Rainbow 1's LAN port and PC via Ethernet cable or under the same network switch, Rainbow 1 default to use DHCP to obtain IP address, IP address of Rainbow 1 will be displayed on the screen by pressing "\v/" key. You're able to access the login page when type the IP address on the web browser of PC, the default username is "admin" for administrator mode and "user" for user mode, no password was set initially, but you're able to set password on webpage at your desire.

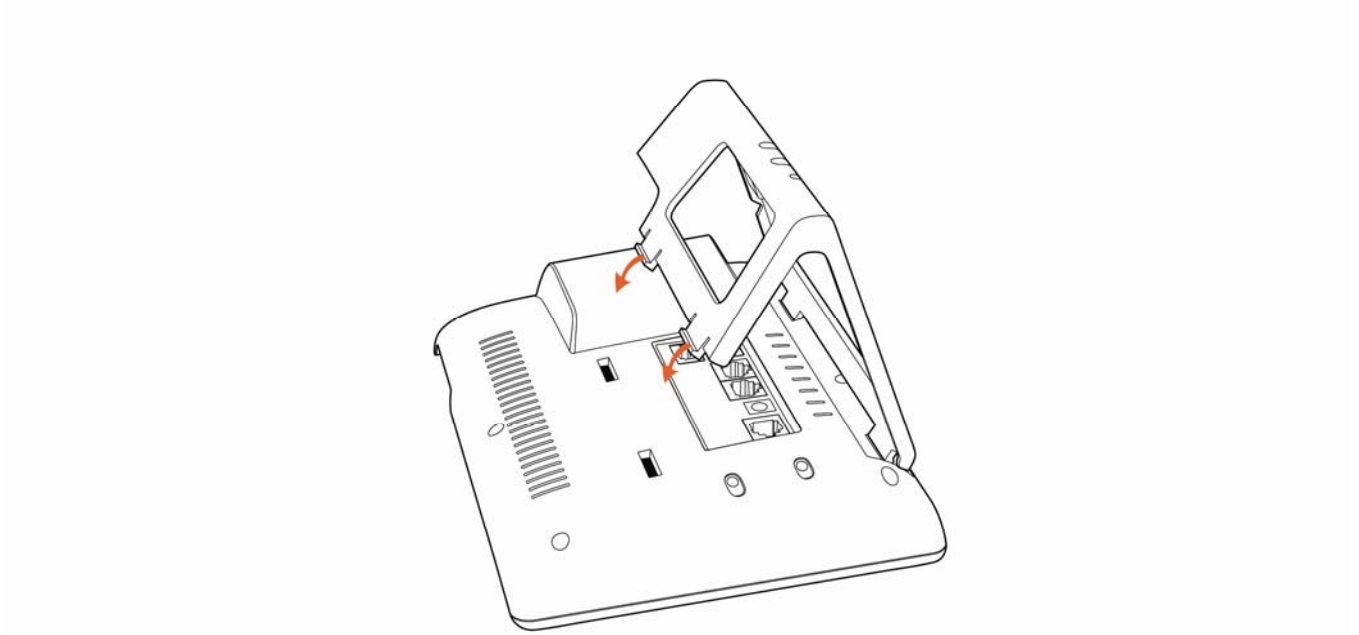

Installation instruction

A. Put the bottom side of the IP phone upside and press one-side joints of stand bracket into the slot, please refer the picture as below:

B. Press the other side joints into the slot according to the direction of the arrow

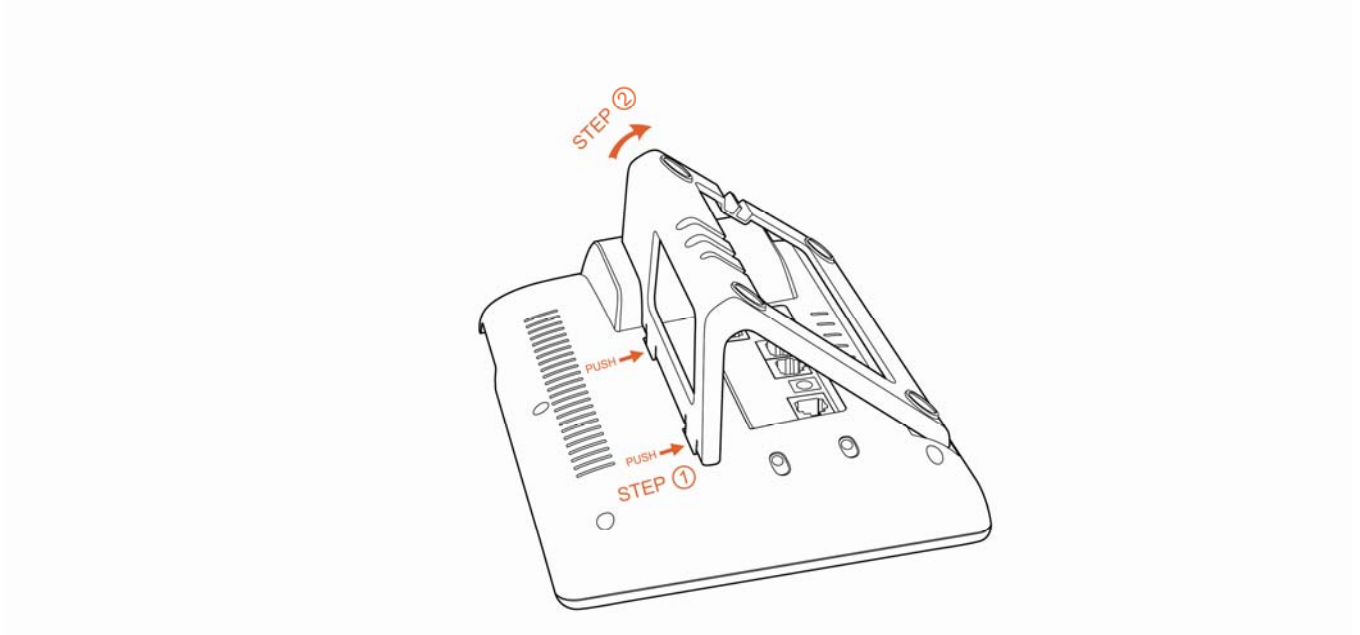

C. It is the right picture after fixing the stand bracket below:

D. Disassemble the stand bracket:

Push the spring joint of stand and pull the stand according to the direction of the arrow. When the joints are pulled out of the slot, you can take off the stand bracket.

2. Keypad of IP Phone

2.1 Describe of the buttons and Screen

Soft Keys	Press to select a function which displayed at the softkey zone of screen
Function of Softkey	Display all optional functions at the last line of LCD screen.
Status Indicator LED	Indicates the phone's status, <ul style="list-style-type: none"> ➤ If the phone is being started ,the LED is on ➤ If the phone is standby, the LED is off ➤ If there is income calling, the LED will be twinkling. The frequency is 120ms on, 120ms off.
LCD Screen	All information such as date, time, phone number, incoming caller's ID(if available),line/call status, extension numbers and the soft key features are displayed on it.
Navigation keys	Allows users to navigate (left, right, up, down).
OK key	Confirm users' operation.
Cancel key	Cancel users' operation.

Dial pad	Entering numbers or characters.
Programmable Keys	All the programmable keys can be defined as BLF key, Redial key etc.
Menu	Open the Keypad menu.
Volume key	Adjust the volume. Volume status will be displayed on LCD when pressing volume key.
Speaker button	Pick up and hung up under the speaker mode, the LED of the button is lighted when speaker on.
Mute button	Mute the handset, headset or speakerphone by press the Mute button; this prevents the person on the active call from hearing what you or someone else in the room is saying. To cancel the Mute function, press the Mute button again.
Headset button	Pick up and hung up under headset mode. The LED button will be lighted when pickup by headset.
Voicemail key	Check the Voicemail status. The LED button will be lighted if new voice message existed.
Hold Key	Hold the current call.
Redial Key	Redial the last phone number dialed recently

3. Basic functions and operations

3.1 Answer the calls

When there is an incoming call, phone will remind user with ringing. There are 3 ways to answer the call

A. Answer by handset

Pick up the handset and talk with the caller. If you want to hang up, just put back the handset. When you are phoning with the handset and want to phone with speaker mode or headset mode, please

press  key or  key, then put down the handset.

B. Answer by speaker

Press  key and talk with callers by built-in Micro-phone and Speaker. If you want to hang

up, please press  key again. Switch calling or talking into handset mode by lifting the

handset under speaker mode. Press  key will switch calling or talking into headset mode.

C. Answer by headset

Keep your microphone connected with the RJ9 headset jack, when there is an incoming call, press

 key and talk with the caller. If you want to hang up, please press  key again.

Pressing  key can change calling or talking into speaker mode, and lifting the handset into handset mode.

3.2 Make Call

A. Use the handset

Pickup the handset and input a phone number. Press soft key "Send" to dial the number. When you hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

B. Use the speaker

Press  key and input a phone number. Press soft key "Send" to dial the number. When caller hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

C. Use the headset

Press  Key and input a phone number. Press soft key "Send" to dial the number. When caller hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

D. Dial from phone book

1. Press  key and enter "Directory". Press "Select" soft key and then find the contact person by navigation keys. When the certain contact person is highlighted, press "Dial" or just pick up the handset to call this number.
2. Pick up the handset, press "Directory" soft key, then select the contact person and press "Dial" soft key.
3. Pick up the handset, press  and enter "Directory", then select the contact person and press "Dial" soft key.

E. Dial from call history

1. Press  key and enter "History", then enter sub-directory "Dialed Calls", "Received Calls" or "Missed Calls" to select one of call history entry, and press "Dial" soft key to call this number.
2. Pickup the handset, press "History" soft key, then select one of call history entry, and press "Dial" soft key to call this number.

3. Pickup the handset, press  and enter "Call History", then select one of call history entry, and press "Dial" soft key to call this number.

3.3 Pre- dial

It's a method to dial a phone number immediacy at standby mode.

- A. Dial-up the phone number at standby mode
- B. Press soft key "Dial" to send out the number

Dial the number end with # Key, the number will be sent out immediately too when you have already picked up the handset or pressed headset/speaker button.

Multiple line dial-up

Rainbow 1 supports up to 2 concurrent calls. If there is a new incoming call when you're talking on Rainbow 1, the new incoming call will be displayed on LCD and status indicator LED will be fast blinking. User can press soft key "Hold" then press "Answer" to receive the new incoming call.

3.4 Hang up the phone

1. Headset hang up

Put back the handset at handset mode, the current calling will be hung up.

2. Speaker hang up

Press  key at Speaker model, the current calling will be hung up.

3. Headset Hang up

Press  key at Headset model, the current calling will be hung up.

4. Hang up one line call

Press the hook to hang up the current calling when 2 calls happened simultaneously.

3.5 Call Transfer

1. Attended call transfer

The attended transfer allows user to call a third-party before transferring the calling.

While on calling, press the "Transfer" soft key to hold the current calling and activate an idle line. Then dial the target number you want to transfer to on the activated line then press "Send" soft key to call that number. After the target party answers the call, press "Transfer" soft key again to complete the transfer.

2. Blind call transfer

The blind transfer allows user to transfer a call without speaking with the receiver of the transferred call. On the user side, the call will be ended as soon as the target phone number is dialed.

Operating steps: Press "More" soft key to get more option, then press "Bxfer" soft key, input the

transfer target number and press "Send" soft key.

3.6 Voicemail

Rainbow 1 has a  key for entering voicemail box and indicating new voicemail. Press  key to enter the menu to configure voicemail number if never configure it previously. Otherwise, the voicemail number will be called after press it.

3.7 Mute calls

The input audio will be not transmitted to peer phone after pressing  key, and the phone will be muted even switched among different modes of speaker, handset and headset. To un-mute, just press  key again.

3.8 Call Hold

The current calling will be hold by pressing soft key "Hold" or  key. And the hold calling will be resumed after pressing soft key "Resume"/  key or the corresponding line key. Even on 3-way conference calling, the 3-way conference calling will be hold after press "Hold" key, and be resume to 3-way conference after press "Hold" Key again. Remember the conversation is still on hold without being ended even if hung up under the status of hold.

3.9 3-Way Conference Call

To initiate a conference call:

Press "More" soft key on calling to get more options, then press "Conf" soft key to start a conference call. Enter the phone number of the third party and press "Send" soft key to send it out.

1. After the third party answers the call, pressing "Conf" key again to establish the 3-way conference.
2. 3-way conference initiator can press "Exit" soft key to quit from the conference and leave the other two parties still in the conversation.
3. If the initiator hangs up the call or press the "End Conf" soft key, the conference will be ended and the calling between the other two parties will be hung up.

3.10 Call History

Rainbow 1 supports 100 missed calls list, 100 incoming calls list and 100 dialed calls list. When the storage is full, the old entry will be erased by the new one.

Press "History" soft key or  key when Rainbow 1 is standby, all the incoming(->), outgoing(<-) and missed calls(!) will be listed. There is other ways to check them:

A. Missed call

1. Press  key.
2. Press  key and  key to select "Call History" then press "Select" soft key.
3. Press  key and  key to select "Missed Calls" then press "Select" soft key.
4. Press  key and  key to browse the missed call record. If there is no record, the LCD display will be indicated "List is Empty".

B. Answered call

1. Press  key .
2. Press  key and  key to choose "Call History" and then press "Select" soft key.
3. Press  key and  key to choose "Answered Calls" and then press "Select" soft key.
4. Press  key and  key to browse the answered call records. If there is no record, the LCD display will be indicated "List is Empty".

C. Dialed call

- 1) Press  key.
- 2) Press  key and  key to select "Call History" and then press "Select" soft key.
- 3) Press  key and  key to select "Dialed Calls" and then press "OK" soft key.
- 4) Press  key and  key to browse the dialed call records. If there is no record, the LCD display will be indicated "List is Empty".

3.11 Default Password

Password is needed to access menu and web.
The default password for accessing menu is 123.

Example:

(xxxxxxx|[*#]xxxx|9,1xxxxxxxxxx|00xxx!) contains 4 subsequences:

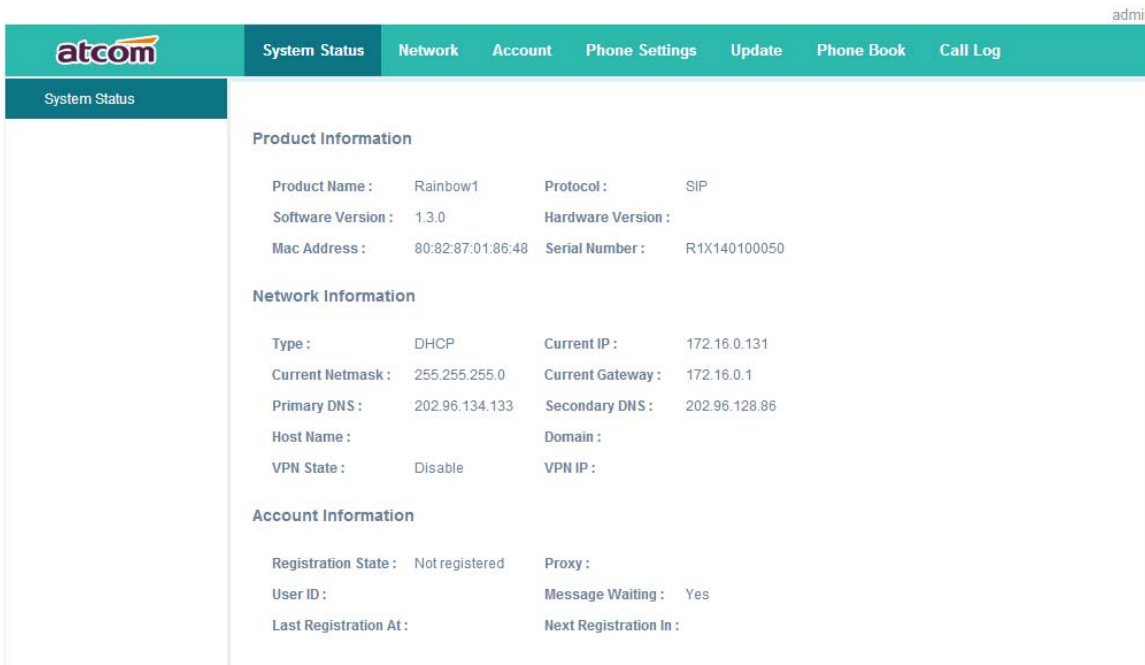

1. Allow to dial numbers with 7 digits
2. Allow to dial numbers with 4 digits and start by '*' or '#'
3. Allow to play an "outside line" dial tone after pressing '9' and dial numbers with 11 digits and start by 1
4. Forbid to dial numbers with 5 digits and start by 00

4. Web settings

Input the IP address in the web browser and press 'Enter' key to access Rainbow 1's user webpage. Click "admin" which is on the right top corner to enter administrator webpage.

4.1 System status

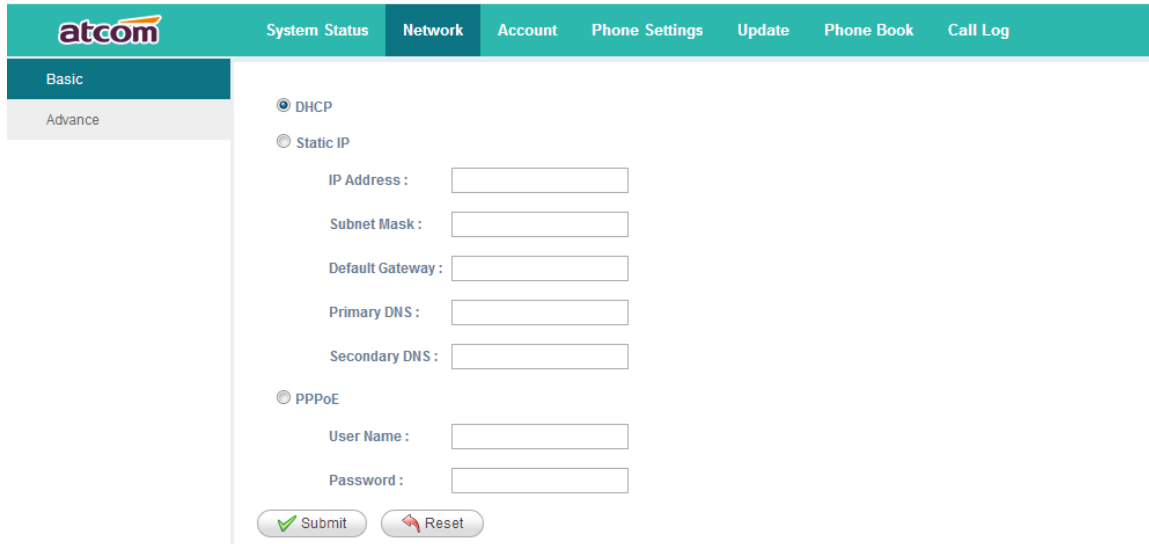

This page shows the IP phone's system status.

1. **Product Information** shows the product name, protocol, software and hardware version, Mac address and serial number.
2. **Network Information** shows the network connection type, IP address, netmask, gateway, DNS, host name, domain and VPN information.
3. **Account Information** shows registration state, proxy, user ID, message waiting on or off , the last and next registration time.

4.2 Network

4.2.1 Basic

There are 3 ways to connect to the internet: DHCP, Static and PPPoE, please choose one according to your own situation.

The screenshot shows the 'Network' configuration page in the atcom web interface. The 'Basic' tab is selected. The 'DHCP' option is selected with a radio button. Below it, the 'Static IP' option is also visible with a radio button. The 'Static IP' section contains five input fields: 'IP Address', 'Subnet Mask', 'Default Gateway', 'Primary DNS', and 'Secondary DNS'. The 'PPPoE' option is also visible with a radio button. Below it, there are two input fields: 'User Name' and 'Password'. At the bottom of the form, there are two buttons: 'Submit' (with a green checkmark icon) and 'Reset' (with a red arrow icon).

Network mode: DHCP, Static IP and PPPoE

1. DHCP

Obtain automatically dynamic IP from DHCP server.

2. Static IP

- a) IP Address: set IP address
- b) Subnet Mask: set netmask
- c) Default Gateway: set gateway
- d) Primary DNS: set primary DNS server
- e) Secondary DNS: set secondary DNS server

3. PPPoE

Connect the LAN port of Rainbow 1 with the Ethernet port of modem then fill user name and password of PPPoE which assigned by ISP (Internet Service Provider).

- a) User name: set PPPoE user name
- b) Password: set PPPoE password

Press 'Submit' button after finishing setting and all the settings info will be saved and taken effect after Rainbow1 reboots.

4.2.2 Advance

➤ Web Server

Web Server

Enable Web Server :

Admin Password : User Password :

HTTP Port :

- ✓ Enable Web Server: Enable or disable web access. If choose "no", you're not able to access Rainbow 1's webpage.
- ✓ Admin password: Set password for admin webpage access. Input 'http://ip-address/index.asp' in the web browser to access admin's login webpage after setting the admin password, then input username(admin) and password to access the admin's webpage.
- ✓ User password: Set password for user webpage access. Input 'http://ip-address/user.asp' in the web browser to access user's login webpage after setting the user password, then input username(user) and password to access the user's webpage.
- ✓ HTTP port: set port for HTTP access (defaults to 80)
For example, the Rainbow 1's IP is 192.168.1.223
HTTP port was set as 100, you have to type "http://192.168.1.223:100" in web browser to enter Rainbow 1's webpage.

❖ VPN

VPN

VPN Enable : VPN Type :

Server Address :

User Name : Password :

1. VPN Enable: Select "Yes" or "No" to enable or disable VPN
2. VPN Type: Only support L2TP VPN
3. Server address: VPN server address
4. Username: VPN account's username
5. Password: VPN account's password

After apply, the phone will be reboot. The VPN IP address will be shown on the System Status webpage.

❖ VLAN

VLAN

You should receive the tagging values of a virtual LAN from your provider. Wrong settings will require factory reset.

VLAN Enable :

Voice VLAN Identifier(1..4094) : Voice VLAN Priority :

Data VLAN Identifier(1..4094) : Data VLAN Priority :

1. Use Vlan Tagging: Select "Yes" or "No" to enable or disable VLAN
2. Voice VLAN Identifier(1..4094) : Assign VLAN ID for voice stream, range from 1 to 4094
3. Voice VLAN Priority : range from 0 to 7, 7 is the highest priority.
4. Data VLAN Identifier(1..4094) : Assign VLAN ID for data stream, range from 1 to 4094
5. Data VLAN Priority : range from 0 to 7, 7 is the highest priority.

➤ Port Link

Port Link

LAN Port Link : PC Port Link :

Choose the network type and port link of LAN/PC

1. LAN Port Link: Auto negotiate, full duplex 10Mbps, full duplex 100Mbps, half duplex 10Mbps, half duplex 100Mbps.
2. PC Port Link: Auto negotiate, full duplex 10Mbps, full duplex 100Mbps, half duplex 10Mbps, half duplex 100Mbps.

➤ Qos

Qos

SIP Qos(0..63) : Voice Qos(0..63) :

QoS: Quality of service

1. SIP Qos: Quality of service for SIP (Diffserv)
2. Voice Qos: Quality of service for RTP (Diffserv)

➤ Syslog

Syslog

Enable Syslog : Log Level :
 Syslog Server : Port :

1. Enable Syslog: Select "Yes" or "No" to enable or disable syslog.
2. Log level: None, Alert, Critical, Error, Warning, Notice, Info, Debug. The debug level is the most detailed.
3. Syslog Server: Syslog Server address.
4. Port: Syslog server port, defaults to 514.

4.3 SIP Setting

➤ Sip Timer Values

Sip Timer Values

Sip T1 :	<input type="text" value="0.5"/>	Sip T2 :	<input type="text" value="4"/>
Sip T4 :	<input type="text" value="5"/>		
Reg Retry Intvl :	<input type="text" value="8"/>	Sub Retry Intvl :	<input type="text" value="10"/>

1. Sip T1: RFC 3261 T1 value (RTT). Range: 0 – 64 sec, defaults to 0.5
2. Sip T2: RFC 3261 T2 value (Maximum retransmit interval for non-INVITE requests and INVITE responses). Range: 0 – 64 sec, defaults to 4
3. Sip T4: RFC 3261 T4 value (Maximum duration a message will remain in the network). Range: 0 – 64 sec, defaults to 5
4. Reg Retry Intvl: Interval to wait before the phone retries registration again after encountering a failure condition during last registration. Range: 0 –65535, defaults to 8
5. Sub Retry Intvl: Interval to wait before the phone retries subscriber again after encountering a failure condition during last subscriber. Range: 0 –65535, defaults to 10

➤ RTP Parameters

RTP Parameters

RTP Port Min :	<input type="text" value="16384"/>	RTP Port Max :	<input type="text" value="16482"/>
RTP Packet Size(ms) :	<input type="text" value="10"/>		

1. RTP Port Min: Minimum port number for RTP transmission and reception. Range: 1–65535, defaults to 16384
2. RTP Port Max: Maximum port number for RTP transmission and reception. <RTP Port Max> should be at least 2 larger than <RTP port Min>.Range: 1–65535, defaults to 16482
3. RTP Packet Size(ms): Packet size in milliseconds, which can be 10ms, 20ms, 30ms, 40ms, 60ms

➤ SDP Payload Types

SDP Payload Types

AVT Dynamic Payload :	<input type="text" value="101"/>	G729ab Dynamic Payload :	<input type="text" value="18"/>
G726 Dynamic Payload :	<input type="text" value="108"/>	G726 Mode :	<input type="text" value="32 kBit/s"/>
iLBC Dynamic Payload :	<input type="text" value="98"/>	iLBC Mode :	<input type="text" value="13.3 kBit/s"/>
Lin16 Dynamic Payload :	<input type="text" value="107"/>	Lin16 Codec Name :	<input type="text" value="L16"/>
G711a Codec Name :	<input type="text" value="PCMA"/>	G711u Codec Name :	<input type="text" value="PCMU"/>
AVT Codec Name :	<input type="text" value="telephone-event"/>	G722 Codec Name :	<input type="text" value="G722"/>
G723 Codec Name :	<input type="text" value="G723"/>	G723 Mode :	<input type="text" value="6.3 kBit/s"/>
G726 Codec Name :	<input type="text" value="G726"/>	G729ab Codec Name :	<input type="text" value="G729"/>
iLBC Codec Name :	<input type="text" value="iLBC"/>		

1. AVT Dynamic Payload---RFC2833 payload type. Defaults to 101
2. G729b Dynamic Payload---G729b dynamic payload type. Defaults to 18
3. G726 Dynamic Payload ---G726 dynamic payload type. Defaults to 108

4. G726 Mode ---G726 codec rate, which can be 16 kBit/s,24 kBit/s,32 kBit/s,40 kBit/s. Defaults to 32kBit/s
5. iLBC Dynamic Payload---iLBC dynamic payload type. Defaults to 98
6. iLBC Mode---iLBC codec rate, which can be 13.3kBit/s, 15.2kBit/s. Defaults to 13.3kBit/s
7. Lin16 Dynamic Payload ---Lin16 dynamic payload type, defaults to 102
8. G711a Codec Name---G711a codec name used in SDP, defaults to PCMA
9. G711u Codec Name---G711u codec name used in SDP, defaults to PCMU
10. AVT Codec Name---AVT codec name used in SDP, defaults to telephone-event
11. G722 Codec Name---G722 codec name used in SDP, defaults to G722
12. G723 Codec Name---G723 codec name used in SDP, defaults to G723
13. G723 Mode---G723 codec rate, which can be 6.3kBit/s, 5.3kBit/s, defaults to 5.3kBit/s
14. G726 Codec Name---G726 codec name used in SDP, defaults to G726
15. G729ab Codec Name---G729ab codec name used in SDP, defaults to G729
16. iLBC Codec Name---iLBC codec name used in SDP, defaults to iLBC

➤ NAT Support Parameters

NAT Support Parameters

Enable Stun :

Stun Server :

1. Enable Stun: Select "Yes" or "No" to enable or disable using stun to discover NAT mapping.
2. Stun Server: Set stun server, which can be IP address or domain name.

4.4 Account

Rainbow 1 has 1 line which is enabled to register by default.

➤ SIP

SIP

Display Name :	<input type="text"/>	User ID :	<input type="text"/>
Authenticate ID :	<input type="text"/>	Password :	<input type="text"/>
SIP Server :	<input type="text"/>	SIP Port :	<input type="text" value="5060"/>
SIP Redundancy Server :	<input type="text"/>		
Use Outbound Proxy :	<input type="text" value="No"/>		
Outbound Proxy Server :	<input type="text"/>	Outbound Proxy Port :	<input type="text" value="5060"/>
Register Expires :	<input type="text" value="300"/>	Subscribe Expires :	<input type="text" value="3600"/>
Transport Type :	<input type="text" value="UDP"/>	SIP 100Rel Require :	<input type="text" value="No"/>
Session Timer Enable :	<input type="text" value="No"/>	Early Update Enable :	<input type="text" value="No"/>
Caller ID Display :	<input type="text" value="No"/>	AutoSubscribeMWIEnable :	<input type="text" value="No"/>
Server List :	<input type="text" value="Common"/>	Dns Mode :	<input type="text" value="A Record"/>
BLF List URI :	<input type="text"/>		

1. Display Name: This name will be displayed on the LCD. It will show the User ID instead if leave Display Name as blank.
2. User ID: Username of sip account.
3. Authenticate ID: Normally is the same as User ID, but blank is acceptable.
4. Password: Password of SIP account.
5. SIP Server: SIP server address, support both IP address and domain name.
6. SIP Port: SIP server port , defaults to 5060.
7. SIP Redundancy Server: SIP redundancy server address.
8. Use Outbound Proxy: Select "Yes" or "No" to enable or disable outbound proxy.
9. Outbound Proxy Server: Set address of Outbound proxy server. All signaling requests will be sent to outbound proxy server firstly.
10. Outbound Proxy Port: Outbound proxy server port.
11. Register Expires: Register expiration time, defaults to 300 seconds.
12. Subscribe Expires: Subscriber expiration time, defaults to 3600 seconds.
13. Transport Type: UDP/TCP/TLS. Defaults to UDP.
14. SIP 100Rel Require: Select "Yes" or "No" to enable or disable 100Rel. If enabled, 100rel parameters will be added to the SIP request to support PRACK.
15. Session Timer Enable: Select "Yes" or "No" to enable or disable Session Timer.
16. Early Update Enable: Select "Yes" or "No" to enable or disable Early Update.
17. Caller ID Display: Select "Yes" or "No" to enable or disable Caller ID display
18. AutoSubscribeMWIEnable: Select "Yes" or "No" to enable or disable SubscribeMWI

19. Server List: Choose the server type.

20. DNS Mode: Choose the DNS mode

21. BLF List URI: Set BLF list URI when Rainbow 1 cooperates with Broadworks (Broadsoft).

➤ Codec Configuration

Codec Configuration

G711A:	<input type="text" value="Yes"/>	G711U:	<input type="text" value="Yes"/>
AVT:	<input type="text" value="Yes"/>	G722:	<input type="text" value="Yes"/>
G723:	<input type="text" value="Yes"/>	G729ab:	<input type="text" value="Yes"/>
iLBC:	<input type="text" value="Yes"/>	G726-16:	<input type="text" value="Yes"/>
G726-24:	<input type="text" value="Yes"/>	G726-32:	<input type="text" value="Yes"/>
G726-40:	<input type="text" value="Yes"/>	Lin16:	<input type="text" value="Yes"/>
Prefer Codec:	<input type="text" value="G711u"/>	User Prefer Codec Only:	<input type="text" value="No"/>
DTMF Tx Method:	<input type="text" value="RFC2833"/>		

1. Prefer Codec: Select a preferred codec for all calls. Defaults to G711u. Conversation will be set up by the prefer codec preferentially if this codec also supported by the remote end. However, the actual codec used in a call still depends on the outcome of the codec negotiation protocol.
2. User Prefer Codec Only: Only use the preferred codec for all calls. The call will fail if this codec not supported by the remote end.
3. DTMF Tx Method: Select the method to transmit DTMF signals to the remote end: Inband, RFC2833, SIP INFO. Defaults to RFC2833.

➤ Call Feature Setting

Call Feature Settings

Message Waiting:	<input type="text" value="Yes"/>	Voice Mail Number:	<input type="text"/>
Pickup Service Code:	<input type="text" value="*8"/>		
UDP Keep Alive Enable:	<input type="text" value="No"/>	UDP Keep Alive Intvl:	<input type="text" value="15"/>
Default Ring:	<input type="text" value="2"/>		
SRTP:	<input type="text" value="No"/>		

1. Message Waiting: Select "Yes" or "No" to enable or disable indication of new voicemail existed.
2. Voice Mail Number: Set voicemail number.
3. Pickup Service Code: Set Pickup Service Code.
4. UDP Keep Alive Enable: Select "Yes" or "No" to enable or disable UDP keep alive. If enabled, Rainbow1 sends UDP packets periodically to keep the server port alive.
5. UDP Keep Alive Intvl: Set interval to send UDP packets.
6. Default Ring: Set default ring tone.
7. SRTP: Select "Yes" or "No" to enable or disable SRTP (Secure Real Time Control Protocol). This feature will be available only when the server supports SRTP.

➤ Dial Plan

Dial Plan

Dial Plan : Dial Plan: Configure dial rule for SIP account, please refer to [dial plan](#).

4.5 Phone Setting

4.5.1 Preference

Language

Language :

Output Volume(1~8)

Handset Volume : SpeakerPhone Volume : Headset Volume : Ring Volume :

Input Gain

Handset Gain : SpeakerPhone Mic Gain : Headset Gain :

LCD

Backlight Level : Backlight Time(Seconds) : Contrast : Keypad Password :

Control Timer Values(Seconds)

Interdigit Long Timer : Interdigit Short Timer : Reorder Delay : Reorder Time :

➤ Language

Support customizable multi-language.

➤ Output Volume(1 ~ 8)

1. Handset Volume: Specify handset volume grade
2. SpeakerPhone Volume: Specify speaker volume grade
3. Headset Volume: Specify headset volume grade
4. Ring Volume: Specify ring tone volume grade

➤ Input Gain

1. Handset Gain: Specify handset gain, the bigger the gain, the louder the other party heard.
2. SpeakerPhone Mic Volume: Specify speaker gain, the bigger the gain, the louder the other party heard.
3. Headset Volume: Specify headset gain, the bigger the gain, the louder the other party heard.

➤ LCD

1. Backlight Level: select the backlight level
2. Backlight Time(Seconds): select the backlight time
3. Keypad Password: set keypad access password

➤ Control Timer Values(Seconds)

1. Interdigit Long Timer: If the numbers or characters input have NOT finished and do NOT full matched the dial plan, it will be NOT dialed out automatically until time out. Range: 0 – 64 sec
2. Interdigit Short Timer: If the numbers or characters input are full matched the dial plan, it will be dialed out automatically until time out. Range: 0 – 64 sec
3. Reorder Delay: It means the delay between the remote end hangs up and reorder tone is played. "0" means the reorder tone will be played immediately. Range: 0 – 60 sec
4. Reorder Time: Set the duration about how long the page of Calling-end displayed

➤ Date And Time

Date And Time

NTP

NTP Server :

Time Zone :

Manual

Set Local Date(YYYY/mm/dd) :

Set Local Time(HH:mm:ss) :

Daylight Saving Time

Daylight Saving Time :

Daylight Saving Time Rule :

NTP: Network time protocol

1. NTP Server: Set NTP server address, IP address or domain name are both acceptable.
2. Time Zone: Choose your own time zone.
3. Daylight Saving Time: Select "Yes" or "No" to enable or disable Daylight saving time.
4. Daylight Saving Time Rule: This parameter is a rule with three fields, each field is separated by semicolon; as show below:
Start=<start-time>; end=<end-time>; save=<save-time>

<start-time> and <end-time> specify the start and end date of daylight saving time, month/date/week and <save-time> is the amount of hour/min/sec to add to the current time during daylight saving period. The <save-time> value can be preceded by a negative (-) sign if subtraction is desired instead of addition.

If <weekday > is 0, it means the date to start or end daylight saving is at exactly the given date. In that case, the <day> value must not be negative. If <weekday > is not zero, then the daylight saving starts or ends on the <weekday > on or after the given date if <day> is positive, or on or before the given date if <day> is negative. If <day> is -1, it means the <weekday> on or before the end-of-the -month (in other words the last occurrence of <weekday> in that month)

Optional values inside [] are assumed to be 0 if they are not specified. Midnight means 0:0:0 of the given date.

E.G. start=4/1/7/8:00:00;end=10/1/7/9:00:00;
 save=-1 Start time is 1st April, Sunday, 8:00:00 am.
 End time is 1st October, Sunday, 9:00:00 am.
 The display time will be one hour early than the standard time.

Manual

1. Set Local Date(YYYY/mm/dd): manually set local date or click  to choose local date .Format: year/month/day.
2. Set Local Time(HH:mm:ss) : manually set local time or click  to adjust local time. Format: hour/minute/second. e.g. 12:00:00.

4.5.2 Features

➤ Speed Dial

Speed Dial

Speed Dial 2 :	<input type="text"/>	Speed Dial 3 :	<input type="text"/>
Speed Dial 4 :	<input type="text"/>	Speed Dial 5 :	<input type="text"/>
Speed Dial 6 :	<input type="text"/>	Speed Dial 7 :	<input type="text"/>
Speed Dial 8 :	<input type="text"/>	Speed Dial 9 :	<input type="text"/>

Set speed dial for 2-9 digit key. For example, set Speed Dial 2: 123456789, then if you press 2, the phone number (123456789) will be dialed immediately. The other digit keys 3/4/5.../9 also can be set as speed dial.

➤ Call Forward

Call Forward

Always Target:	<input type="text"/>	Busy Target:	<input type="text"/>
No Answer :	<input type="text"/>		
After Ring Time(Seconds) :	<input type="text" value="5"/>		

1. Always Target: Every incoming call will be forwarded to this target.
2. Busy Target: The incoming call will be forwarded to this target when Rainbow1 is busy.
3. No Answer: The incoming call will be forwarded to this target when there is no answer.
4. After Ring Time(Seconds): After this time out, the incoming call will be forwarded to this target if no answer. Defaults waiting for 5 seconds.

The priority of Always Target is highest when Always Target, Busy Target and No Answer Target have been set. This means all the incoming call will be forwarded to the Always Target.

➤ Call Settings

Call Settings

Do Not disturb :	<input type="text" value="No"/>	Call Waiting :	<input type="text" value="Yes"/>
Block Call ID :	<input type="text" value="No"/>	Block Anc Call :	<input type="text" value="No"/>
Auto Answer :	<input type="text" value="No"/>		

Others

Send Key :	<input type="text" value="#"/>
------------	--------------------------------

1. Do Not Disturb: Select "Yes" or "No" to enable or disable DND (Do Not Disturb).When DND enabled, all the incoming calls will be rejected. At this moment if Always Target or Busy Target was set, all incoming calls will be forwarded to the targets preferentially.
2. Call Waiting: When Rainbow 1 is on calling, and Call Waiting enabled , any new incoming calls will not be rejected but ringback tone can be heard by the remote end. if Call Waiting disabled, only one conversation will be available even multi-accounts have been registered on Rainbow 1 .
3. Block Call ID: Select "Yes" here, Caller ID will be blocked, Rainbow 1 will call others as anonymous.
4. Block Anc Call: Select "Yes" here, all anonymous call will be blocked, Rainbow 1 will reject all anonymous callers.
5. Auto Answer: Select "Yes" here, Rainbow1 will answer all incoming calls by speaker automatically.
6. Others: Define the Send key as "*" key or "#"Key. Press "*"Key or "#"Key follow those phone number you want to dial, then number will be dialed out immediately.

4.5.3 Voice

Preference	
Features	
Voice	Echo Cancellation
Ring	VAD: <input type="text" value="No"/> CNG: <input type="text" value="Yes"/>
Tone	Jitter Buffer
	Type: <input type="text" value="Fixed"/>
	Min Delay: <input type="text" value="0"/> Max Delay: <input type="text" value="300"/>
	Normal Delay: <input type="text" value="120"/>
	<input type="button" value="Submit"/> <input type="button" value="Reset"/>

Echo Cancellation

1. VAD: Select "Yes" or "No" to enable or disable VAD (Voice Active Detection). If enable, RTP packets will not be sent when Rainbow1 is mute.
2. CNG: Select "Yes" or "No" to enable or disable CNG (Comfort Noise Generator). If enable, comfortable noise will be sent to the remote end to let it perceive the conversation is still active when Rainbow1 is mute.

Jitter Buffer

Rainbow 1 is able to buffer incoming voice packets to minimize out-of-order packet arrival. This process is known as jitter buffer.

1. Type: Choose type of jitter buffer. When choose Fixed, the size of jitter buffer is fixed. When choose Adaptive, the size of jitter buffer is the sum of Minimum Delay and the size of RTP packets.
2. Min Delay: The minimum delay of the jitter buffer.
3. Max Delay: The maximum delay of the jitter buffer.
4. Normal Delay: This is used to set fixed jitter buffer which should be between Min Delay and Max Delay.

4.5.4 Ring

Preference	Notes: Ring tone must be wav file, 8k sampling rate, 8 Bit u-law compression. File size should < 200Kbytes	
Features	Upload Ring Tone	<input type="button" value="选择文件"/> 未选择文件 <input type="button" value="Upload"/>
Voice	Ring Tone Type	<input type="button" value="User Define 1"/> <input type="button" value="Delete"/>
Ring		
Tone		

Administer can upload 2 user define ring. The ring file should be wav (8k, 8bit, u-law) and no larger than 200 KBytes.

4.5.6 Tone

Preference	Tone	
Features	Country Stands :	<input type="button" value="Custom"/>
Voice	Dial Tone :	<input type="text" value="350@-23,440@-23:60(*0/1+2)"/>
Ring	Outside Dial Tone :	<input type="text" value="420@-19:60(*0/1)"/>
Tone	Busy Tone :	<input type="text" value="480@-23,620@-23:10(.5/.5/1+2)"/>
	Reorder Tone :	<input type="text" value="480@-23,620@-23:10(.25/.25/1+2)"/>
	Off Hook Warning Tone :	<input type="text" value="480@-21,620@0:10(.125/.125/1+2)"/>
	Ring Back Tone :	<input type="text" value="440@-23,480@-23:*(2/4/1+2)"/>
	MWI Dial Tone :	<input type="text" value="350@-23,440@-23:2(.1/.1/1+2);10(*0/1+2)"/>
	Holding Tone :	<input type="text" value="350@-23,440@-23:60(*0/1+2)"/>
	Conference Tone :	<input type="text" value="350@-23,20(.1/.1/1..1/9.7/1)"/>
	<input type="button" value="Submit"/> <input type="button" value="Reset"/>	

Set the ToneScript for each tone.

For example, MWI Dial Tone: [350@-19,440@-19;2\(.1/,1/1=2\);10\(*0/1+2\)](#)

Frequency1, Frequency2 ;Cadence Section1;Cadence Section2

[350@-19](#): Frequency1 is 350HZ at -19dBm

[440@-19](#): Frequency2 is 440HZ at -19dBm

[2\(.1/,1/1=2\)](#): Cadence Section length is 2s, 0.1s on, 0.1s off, with frequencies 1 and 2

[10\(*0/1+2\)](#): Cadence Section length is 10s, always on(* means always, 0 means never), with frequencies 1 and 2.

1. Country stands: Select a country standard tone as default.
2. Dial Tone: The prompting audio to remind user to enter a phone number for dialing
3. Outside Dial Tone: The prompting audio to remind user to enter an external phone number (versus an internal extension). This is triggered by a “,” character encountered in the dial plan.
4. Busy Tone: The promoting audio when a 486 RSC is received for an outbound call.
5. Reorder Tone: The promoting audio when an outbound call failed or after the remote end hangs up an established call.
6. Off Hook Warning Tone: The promoting audio when user does not put the handset on the cradle properly.
7. Ring Back Tone: The promoting audio when the remote end is ringing.
8. MWI Dial Tone: The promoting audio when an unread voicemails existed.
9. Holding Tone: Indicate the local end that the current calling is hold by the remote end.
10. Conference Tone: The promoting audio to all parties when a 3 way conference is in progress.

4.6 Update

4.6.1 Manual Update

Manual Update	Bootloader Version: 2.3 Firmware Version: 1.3.0 Hardware Version:	
Auto Provision	Boot Loader: <input type="button" value="选择文件"/> 未选择文件	<input type="button" value="Upgrade"/>
Reset & Reboot	Firmware: <input type="button" value="选择文件"/> 未选择文件	<input type="button" value="Upgrade"/>
	Kernel: <input type="button" value="选择文件"/> 未选择文件	<input type="button" value="Upgrade"/>
	Configuration: <input type="button" value="选择文件"/> 未选择文件	<input type="button" value="Upgrade"/> <input type="button" value="Download"/>
	Phone Book: <input type="button" value="选择文件"/> 未选择文件	<input type="button" value="Upgrade"/> <input type="button" value="Download"/>

1. Boot Loader: Download Boot file from ATCOM's webpage, then select the file from your PC to upgrade.
2. Firmware: Download firmware from ATCOM's webpage, then select firmware from your PC to upgrade.
3. Kernel: Download kernel from ATCOM's webpage, then select kernel from your PC to upgrade.
4. Language Package: Download Language Package from ATCOM's webpage, then select the package from your PC to upgrade. Please note that, the language package you updated will replace the existed language on the phone.
5. Configuration: Upgrade config.xml file.
6. Phone Book: Upgrade phonebook.xml file

4.6.2 Update/Auto Provision

Manual Update	<p>Configuration Profile</p> <p>Provision Enable : <input type="button" value="No"/> Resync Random Delay : <input type="text" value="0"/></p> <p>Profile Rule : <input type="text"/></p> <p style="color: red; font-size: small;">right format,like ftp://192.168.1.121/config.xml</p> <p>Firmware Upgrade</p> <p>Upgrade Enable : <input type="button" value="No"/> Error Retry Delay : <input type="text" value="0"/></p> <p>Upgrade Rule : <input type="text"/></p> <p style="color: red; font-size: small;">right format,like ftp://192.168.1.121/FirmwareName.FW</p> <p><input type="button" value="Submit"/> <input type="button" value="Reset"/></p>
Auto Provision	
Reset & Reboot	

Configuration Profile

1. Provision Enable: Select "Yes" or "No" to enable or disable auto provision
2. Resync Random Delay: Set a random delay to upgrade configuration files.
3. Profile Rule: FTP/TFTP/HTTP protocol supported

Firmware Upgrade

1. Update Enable: Select "Yes" or "No" to enable or disable firmware update
2. Error Retry Delay: Set interval to retry update after encountering update failed
3. Upgrade Rule: The same as Profile Rule, the suffix of the firmware name should be '.fw' or '.FW' and the firmware name includes blank character or Chinese characters are not permitted.

4.6.3 Reset & Reboot

Manual Update	<p>Reboot System Now</p> <p><input type="button" value="Reboot"/></p> <p style="color: red; font-size: small;">Warning : Reboot system will terminate all active calls!</p> <p>Reset to Factory Setting</p> <p><input type="button" value="Reset"/></p> <p style="color: red; font-size: small;">Warning : A factory Reset will erase all configuration data on the system! Please do not power off the system. Any power interruption during this time could cause damage to the system!</p>
Auto Provision	
Reset & Reboot	

1. Reboot

Reboot will terminate all active calls, and restart the phone in a several seconds.

2. Reset

Click the "Reset" button will set Rainbow 1 to factory default, please backup the config.xml, phonebook.xml and attendant_keypad.xml before reset.

4.7 Phone Book

Phone Book

Mode	Name	Number	
1	Directory <input type="text" value="voicemail"/>	<input type="text" value="6750"/>	Delete
2	Directory <input type="text" value="salvator"/>	<input type="text" value="9527"/>	Delete

1. New Contact: Add a new phonebook record.
2. Delete All: Delete all the phonebook records.
3. Mode: Directory or Blacklist. All calls from Blacklist will be rejected.
4. Name: Specify a name for each phone number. This name will be displayed on LCD when call to this number or call from this number.
5. Number: Phone number.
6. Submit: Submit to apply the change.
7. Reset: Cancel the inputting.
8. Delete: Delete this record.

Notice: The maximum of records in the phone book is 200.

4.8 Call Log

Diald

	Name	Number	Time
1:	5039	5039	20/02 11:40
2:	5032	5032	20/02 11:39
3:	5069	5069	20/02 11:39

Diald

2:	IP Call	172.16.0.116	20/02 11:40
3:	5069	5069	20/02 11:39

1. Redial: Record of dialed list, maximum 100 records.
2. Received: Record of received list, maximum 100 records.
3. Missed: Record of Missed list, maximum 100 records.

5. FAQ & Trouble Shooting

Frequently Asked Questions

5.1 How to make a factory reset

There are three ways to make a factory reset:

1. Factory reset from keyboard, steps are:

a) Press

b) Find and select 'Factory Reset'.

c) Press 'OK' key, then the phone will be restarted automatically and factory reset.

2. Factory reset through web, please refer to [Reset & Reboot](#);

3. Factory reset during rebooting, steps are:

a) Keep pressing '*' and '#' key.

b) Plug in the power adapter.

c) Wait for about 5 seconds, Rainbow 1 will be reset to factory default setting after rebooted.

5.2 Upgrade firmware under safe mode

If the phone could not started up normally, please upgrade firmware under safe mode. Steps are:

1. Build a TFTP server and set its IP address as 192.168.1.200.

2. Copy the firmware to the root directory of the TFTP server and modify the file name as Rainbow1.FW.

3. Make sure the TFTP server and the phone are connecting with the same switch and reachable to each other;

4. Keep pressing '#' key and start up the phone until the LCD displays 'Upgrading...';

5. The phone will download the firmware from the TFTP server;

6. After the download is done, the phone will upgrade automatically;

7. After the update is finished, the phone will start up with the factory configuration.

5.3 How to make direct IP call

When hook off/ pressing speaker or headset key,

1. Press soft key 'Num' until it switch to 'IP'.

2. Using '*' key to input '.'. If user wants to dial 192.168.1.100, then press 192*168*1*100.

3. After inputting the IP address, press dial key to dial it out.

6. Trouble Shooting

6.1 The phone can't register successfully

1. Check the IP address, and if the mode of WAN port is DHCP, please make sure the DHCP server is in service.
2. Check the gateway.
3. Check the DNS.
4. Make sure the information of the account is consistent with which offered by the service supplier.
5. Make sure the SIP server is on.
6. Check the port of the SIP server whose default value is 5060.

6.2 The phone can't obtain IP address

1. Make sure the cable has been connected to the LAN port of the phone.
2. Make sure the cable and the switch's port that connected with the cable is available.
3. Make sure the DHCP server is on and there are some assignable IP addresses in the address pool.
4. Try to change the LAN port mode as Static.

6.3 Only one part can hear the voice during the call

1. Make an IP dial-up call to make sure the telephone receiver and microphone are normal.
2. Enable STUN on web page.
3. Set STUN server as `stun.sipgate.com`.
4. Click 'submit' and wait for the phone to restart.
5. Try to make calls again.

7. Abbreviations

DND : Do Not Disturb
CFWD : Call Forward
Bxfer : Blind Transfer
Conf : Conference
Num : Number
DelChr : Delete Char
Y/N : Yes/No
SIP: Session Initiate Protocol
RTP: Real-time Transport Protocol
SDP: Session Description Protocol
VPN: Virtual Private Network
VLAN: Virtual Local Area Network
QoS: Quality of Service
Syslog : System log
UDP: User Data Protocol
TCP: Transmission Control Protocol
TLS: Transport Layer Security Protocol
BLF: Busy Lamp Field
DNS: Domain Name System
SRTP: Secure Real-time Transport Protocol
NTP: Network Time Protocol
VAD: Voice Activity Detection
CNG: Comfort Noise Generator
